Indian Chemical Industry

Asia is emerging as a key player in the development of global chemical industry in the world, and India is being considered one of the most promising country within this region. India is the third-largest producer of chemicals in Asia, after China and Japan. However, when it comes to overall contribution to global chemicals, it contributes only 3 per cent of the overall GDP.

The Government of India has already highlighted the importance of this sector and prepared a plan to develop the industry to its maximum capabilities. Subgroups including Petrochemicals and Organic Chemicals, Chlor-Alkali & Inorganic Chemicals, Speciality Chemicals including Dyestuffs and Dye intermediates, Pesticides and Agrochemicals, Pharmaceuticals Intermediates, etc will all play a vital role in the overall enlargement of the industry.

Further, Indian government has set ambitious plans to set up Petroleum, Chemicals & Petrochemicals Investment Regions (PCPIR) in Gujarat, Andhra Pradesh, West Bengal and Odisha to accelerate the country's industrial growth. PCPIR in Dahej, Gujarat is already functioning and attracting ample investment from global players. The government aspires to create 100 million additional jobs through creation of National Investment and Manufacturing Zones (NIMZs) as mega investment regions, equipped with world class infrastructure.

Speciality Chemicals

During 11th Five Year Plan (FY07 to FY11) the speciality chemicals segment has grown at 11-13 per cent p.a. This is quite the fact that has influenced Chemtech Foundation to put special focus on the sector and integrating it with our already established show ChemPetro World Expo. Currently valued at 17.7 billion, the Speciality Chemical Industry "has the potential to reach USD 38 billion by the end of 12th Five Year Plan." According to planning commission's report, Automotive Sector (growing in excess of 10%), Constructive Chemical Industry (rowing in excess of 16 per cent p.a.), Water Chemicals, Textile Chemicals and Personal Care are the key driving industries for the growth of Speciality Chemical Industry in the country.

Opportunity for Chemical & Petrochemical Companies and Speciality Chemical Manufacturers in India

→ The Indian chemical industry has got potential to grow at 11% p.a. to reach size of \$224 billion by 2017.

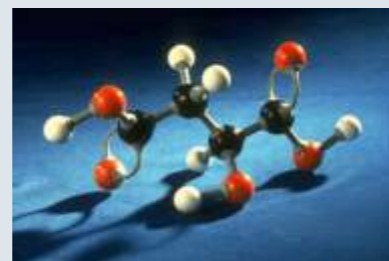

→ India will witness a huge investment in chemical & petrochemical and speciality chemical manufacturing sectors by 2020.

→ Reports suggest that the developing economies will play a crucial role in the development of petrochemicals over 2012-2022. The value of these markets will increase dramatically and suppliers are expected to shift their focus from the developed economies to the developing economies.

→ India emerges as one of the focus destinations for chemical companies worldwide.

→ India's speciality chemicals segment has a potential to grow at the rate of 13-14 percent per annum during the 12th Five Year Plan period (2012-17)

→ Events like Chemtech South 2013 will allow the industry players, key decision makers, government official and policy makers to assemble at one place, and discuss and analyze future opportunities and chalk out plans to make the most of them.

October 10-12, 2013

Venue: Chennai Trade Centre, Chennai, Tamil Nadu, India

INTEGRATED PLATFORM TO ASSOCIATE WITH THE LARGEST USER INDUSTRY OF SPECIALITY CHEMICALS & PETROCHEMICALS IN THE WORLD'S FASTEST GROWING MARKETS

CHEMTECH Foundation is India's leading industry association since 1975. The CHEMTECH Foundation has connected the Chemical Process Industry in India with a constant focus on innovations and technology. Over the years the Foundation has been focusing on eight industry verticals as follows:

- Chemical Process
- Pharmaceutical & Biotechnology
- Oil & Gas
- Shipping Marine & Ports
- Industry Automation & Control
- Water Management
- Power & Energy
- Infrastructure, Architecture & Design

As CHEMTECH Foundation gears up to enter the fifth decade, it has continued treading on its mission of 'Inspiring Intelligence... Igniting Innovation' and catalysing industrial growth through its unique industry platforms. After the successful Chemtech World Expo 2013 at Mumbai, India, the foundation is all set to organise next edition of CHEMTECH South 2013 from 10th to 12th October 2013 at Chennai Trade Centre, Chennai.

We are glad to introduce Speciality Chemical Word Expo 2013 + ChemPetro South 2013 - an international event for Chemical & Petrochemical Companies and Speciality Chemical Manufactures. CHEMTECH has already achieved accolades for its international show - ChemPetro World Expo, which is being organised successfully for many years. The new addition in the form of - Speciality Chemical World Expo 2013 will add new dimension to the show and allow speciality chemical manufacturer to discuss the growth opportunities with chemical and petrochemical companies.

Highlights of the Show

1 Congregation of global players: This integrated exhibition and conference will bring national and international user industry, manufacturers and service providers, consultants, et al under one roof and facilitate greater synergies among them.

2 Focused interaction: Participants will be benefitted with the micro and macro level discussions conducted during the conference. A number of international speakers will address the audience and enlighten them on various prevailing issues affecting chemical & petrochemical companies around the globe.

3 Connect with the world: It will be one of the substantial opportunities to connect with the leaders in the industry. As companies disclose their plans, there will be immense opportunities to identify business opportunities around the globe.

4 International Exhibition: Chemtech Exhibition will be a right platform for you to showcase your products and services to the world. Chemtech boast of a strong visitor profile that includes Presidents and CEOs, Engineering Professionals, Project Managers, Technology Experts, Researchers and Scientists, Marketing Professionals, etc.

Scope of the Exhibition

Speciality Chemicals

- Agrochemical Intermediates
- Biocides
- Catalysts
- Chemical Intermediates
- Colorants & Dyes
- Electronic Chemical
- Flavours / Fragrance
- Organic Intermediates
- Peptides
- Pharmaceutical Excipients/ Intermediates
- Photographic Chemicals
- Plastic Additives
- Printing Ink Chemicals
- Reprographic Chemicals
- Surfactants
- Water Treatment Chemicals

- Inorganic Chemicals
- Chloralkali
- Organic Chemicals
- Fine & Speciality chemicals
- Agrochemicals & Fertilizers
- Pigments, Dyestuffs & Intermediates
- Paints & Coatings
- Personal care

Petrochemicals

- Petro Products
- Feedstock manufacturers & suppliers
- Lubricants
- Aromatics & Olefins
- Polymers & Plastics
- Synthetic fibers & Elastomers

Visitors' Profile

- Presidents & CEOs
- Engineering Professionals
- Technology Experts
- Researchers & Scientists
- Marketing Professionals
- Delegates from India and Overseas
